The Wonders of Why?!

Science Matters For Kids™

A Hands-On STEM Enrichment Program

Real Science For Kids ages 3 through 10!

***The sky is blue! Birds can fly! Tides rise and fall!
BUT WHY???***

Children are taught what is, but hardly ever taught why. They wonder why, but are discouraged from asking. We want to allow them the opportunity to figure out the answers on their own through hands-on discovery!

From Astronomy to Zoology and Aristotle to Zuckerberg, children are fully engaged throughout each lesson experiencing the scientific method through use of multiple learning styles!

*\$189 allows your child to experience ten (10),
45 min, hands-on, interactive lessons.*

This includes a multitude of materials
with which your child will be working

Also, bringing home for further experimentation after EVERY class

You will also **receive a detailed flyer** that gives you some information about what your child learned in class, plus additional information around that concept so that you can continue their exploration at home together.

*Each 45 minute class will be held every
Thursday or Friday at 1:00 starting on October 2nd
No class the week of Thanksgiving.*

So sign up your future scientist now,
so they won't miss a single lesson.

Fill out the information on the reverse side of this sheet and leave it in your child's school office with a check made out to
